Table of Contents

TRACK A: SYSTEMS INTEGRATION

The Integration of Work Redesign and Information Technology
John J. Powers and Anthony T. Liotti 3

Fundamentals of Systems Integration
James A. Bontadelli and Kenneth E. Kirby 13

Vision Into Action™: An Overview
John M. Samuels and Alexander J. Ogg 23

Cost Management and Performance Measurement in Integrated Systems
Robert A. Bonsack and Joseph Donnelly 37

IIE Certification Program in Systems Integration
David W. Hess 41

Modular Software for Integrated Factory Management Systems
Steven A. Vogel 61

Managing Discrete Projects in a Systems Integration Initiative
David B. Pratt 71

Benchmarking the Soft and Hard Sides of Manufacturing Excellence
Michael F. Stautner and Joe E. Mize 81

Applying the Lessons Learned in Improving Manufacturing Operations
Dan C. Krupka 91

CIM at Apple Computer, Inc.—A Case Study
Michael Kaskowitz 97

TRACK B: TIME-BASED COMPETITION

Redesigning Products for a Time Based Competitive Advantage
Hal Mather 107

Sales and Operations Planning: Just in the Nick of Time
Gerald J. Bose and James A. Welch 117

The SMED System for Setup Reduction—A Case Study
Paul M. Szatkowski and Roderick J. Reasor 123

Lead Time Reduction in the Warehouse
Frank Daly and Dennis Griffith 131

Determination of Optimal Intermediate Storage Capacity
Abdolazim Houshyar 139

TRACK C: TOTAL QUALITY MANAGEMENT

Breakthough Thinking: A New Problem-Solving Paradigm for Total Quality Management
David W. Ralston and Gerald Nadler 151

Quality Improvement Through Robust Design
Kailash C. Kapur 159

Process Evaluation, Control, and Improvement: An Approach for Improving Operating Team Effectiveness
David M. Sandidge and David C. Stump 169

TRACK D: REDESIGNING FOR IMPROVED PERFORMANCE

Integrated Change Management: 2000+
Donald E. White 177

Predictive Technology: The Need to Integrate
Keith E. Burres 189

Performance Management Framework
Nicholas J. Kaminsky 197

A Supervisory Compensation Plan Based on Performance
Alberto Garcia-Diaz, Biman Das, and Pradyot K. Sen 203

A Computer Based Model for Performance Analysis of Production Workers: A Case Study
Celestine A. Ntuen, Eui H. Park, and Ursula R. Wright 213

A Paradigm Shift in Thinking as a Strategic Advantage
Gerald Nadler 221

Assessing Modular and Cellular Manufacturing
James R. Ross 231

Changing the Maintenance Culture in a Traditional Manufacturing Environment
Marla E. Hacker 241

TRACK E: UTILIZING THE TEAM APPROACH

Competency-Based Certification for Team Development
Mike Adair 249

Multifunctional Equipment Design Teams
Anne E. Newman 253

Group Productivity Through Functional Analysis
Jeffrey S. Fliss 263

Organizing an Unsuccessful Team
Richard M. Morris, III 271

Teamwork—What's In It For Us?
Jim Hayes 279

High Performance Manufacturing Through Self-Guiding Teams
Thomas E. Hayes and Glendon W. Snider 285

TRACK F: BUILDING A CAREER IN A CHANGING FIELD

Industrial Engineering's Role in the Emerging Theory of Manufacturing
Philip M. Wolfe and Kimberly D. Beaumariage 291

New Directions for Industrial Engineers in Manufacturing
Robert R. T. Rowan 299

Industry and Academia White Paper on the Industrial Engineer (IE) of the Future
G.Kemble Bennett and Lot Voller (coordinating presenters) 303

The Role of the Industrial Engineer in Team Building, Training, and Facilitation
Robert F. Wolf 317

Industrial Engineering Techniques for Plant Engineers
James R. Ross 321

The Industrial Engineer's Role in Quality Improvement
Carlisle R. Davis 329

The Paradigm Shift in Engineering Economy
William G. Sullivan 333

Industrial Engineering Activities in Public Utilities
Richard E. Kraemer 343

Industrial Engineer's Role in Public Utilities and Service Industries—As Practiced at Con Edison
Telford A. Williams 347

TRACK G: INTERNATIONAL PRODUCTIVITY REPORT

Hong Kong's Approach to Manufacturing Competitiveness
Peter P. Yim 357

Country Report on Productivity Improvement
Masahiro Nowatari 363

TRACK H: BECOMING A PROFESSIONAL

Career Planning: Second (or First) Job Search Out of College
Gordon S. Mead 375

PAPER FAIR

An Intelligent Decision Support System for Facility Location
Colin O. Benjamin and Chamnong Jungthirapanich 385

Academic Programs in Manufacturing Engineering: Forecast and Implications
Stanley F. Bullington 393

Modeling the Manufacturing Process: An Assessment of Three Approaches to Simulation
Douglas Schmidt, Jorge Haddock, and William A. Miller 401

Proactive Quality Assurance: Concept, Strategy, and Tools
William J. Kolarik and J. N. Pan 411

An FMS Planning Procedure with Material Handling Considerations
Sharad K. Maheshwari, Lawrence C. Leung, and William A. Miller 421

Rewarding Small Group Action Teams
John L. Niles 431

A Neural Network Mo[illegible]listic Inventory System
Celestine A. N[illegible] 435

Rough Cut Cap[illegible]preadsheet Software
Howard W. [illegible] 445

Computerized Maintenance Management System Software Selection
Donald W. Palmer 455

Scheduling Production Sequences Using a Multivariate Loss Function
Laura B. Raiman and Kenneth E. Case 463

Implementation Process Assessment for Automation Projects
Silvanus J. Udoka 471

Tailoring Work Standards to Meet Customer Needs
William L. Czeschin 481
